Dyadic Data Analysis with the Actor-Partner Interdependence Model (APIM) in R

EAOHP 2026 Workshop

2026

Primary References

The following references accompany the EAOHP 2026 workshop on dyadic data analysis with the Actor-Partner Interdependence Model (APIM) in R.

How to use this list. The first 8 entries are *methods* references on APIM and the R packages used in the workshop. The last 2 are the *primary textbook* and the *applied example* whose data structure our simulated data emulate. Each entry has a one-line note on *when* to read it.

Foundational APIM papers

- **Kenny, D. A., Kashy, D. A., & Cook, W. L. (2006).** *Dyadic data analysis*. Guilford Press. The primary APIM textbook — the conceptual and analytic basis for the workshop.
- **Cook, W. L., & Kenny, D. A. (2005).** The Actor-Partner Interdependence Model: A model of bidirectional effects in developmental studies. *International Journal of Behavioral Development*, 29(2), 101–108. The foundational paper that articulated APIM in psychology.
- **Kenny, D. A., & Ledermann, T. (2010).** Detecting, measuring, and testing dyadic patterns in the Actor-Partner Interdependence Model. *Journal of Family Psychology*, 24(3), 359–366. Introduces the k-pattern tests (actor-only, couple, contrast) used to interpret APIM effects.

Handbook chapters and practical introductions

- **Kashy, D. A., Donnellan, M. B., & Ackerman, R. A. (2017).** Dyadic analysis. In A. L. Vangelisti & D. Perlman (Eds.), *The Cambridge handbook of personal relationships* (2nd ed., pp. 101–115). Cambridge University Press. Modern, accessible handbook chapter covering dyadic data analysis end-to-end.
- **Ackerman, R. A., Donnellan, M. B., & Kashy, D. A. (2011).** Working with dyadic data: An introduction. In L. M. Horowitz & S. N. Strack (Eds.), *Handbook of interpersonal psychology: Theory, research, assessment, and therapeutic interventions* (pp. 547–558). Wiley. Concise, practical introduction with worked examples — a good first methods read.

SEM specification for indistinguishable dyads

- **Olsen, J. A., & Kenny, D. A. (2006).** Structural equation modeling with interchangeable dyads. *Psychological Methods*, 11(2), 127-141. SEM specification for *indistinguishable* dyads — underpins the wide-format lavaan syntax we use in script 03.

Worked SEM tutorial (k-pattern tests)

- **Fitzpatrick, J., Gareau, A., Lafontaine, M.-F., & Gaudreau, P. (2016).** How to use the Actor-Partner Interdependence Model to estimate different dyadic patterns in Mplus: A step-by-step tutorial. *Tutorials in Quantitative Methods for Psychology*, 12(1), 74-86. Worked SEM tutorial on the k-pattern tests; closely parallels our lavaan scripts 05 and 06 (despite the Mplus label, the model specification is identical).

R implementation

- **Rosseel, Y. (2012).** lavaan: An R package for structural equation modeling. *Journal of Statistical Software*, 48(2), 1-36. The R-side SEM engine used in scripts 03, 05, 06, and 07.

Extension: intensive longitudinal / diary designs

- **Bolger, N., & Laurenceau, J.-P. (2013).** *Intensive longitudinal methods: An introduction to diary and experience sampling research*. Guilford Press. Methods reference for the diary / ESM extension of APIM (days within persons within dyads; see slide 30).

Applied example (the data structure our scripts emulate)

- **Hahn, V. C., Binnewies, C., & Dormann, C. (2014).** The role of partners and children for employees' daily recovery. *Journal of Vocational Behavior*, 85(1), 39-48. The applied example our scripts emulate — reproduced in scripts/08_moderated_apim.R.
-

Local workshop materials

- scripts/01_simulate_data.R — Data generation
- scripts/02_indistinguishable_mlm.R — Indistinguishable dyads, MLM
- scripts/03_indistinguishable_sem.R — Indistinguishable dyads, SEM (wide format, lavaan)
- scripts/04_distinguishable_mlm.R — Distinguishable dyads, MLM
- scripts/05_distinguishable_sem_moderation.R — Distinguishable dyads, SEM with gender moderation
- scripts/06_distinguishable_sem_wide.R — Distinguishable dyads, SEM wide format
- scripts/07_two_intercept_models.R — Two-intercept (actor-partner) models
- scripts/08_moderated_apim.R — Moderated APIM, replicating Hahn, Binnewies, & Dormann (2014)
- exercises/ — Student exercises
